HIGH QUALITY

WHAT DO YOU MEAN

Dickinson shotguns deliver a rare combination of quality, old-world craftsmanship and innovation for hunters and shooting sports enthusiasts. Whichever Dickinson model you select, this will be a gun you are proud to own, proud to shoot and proud to pass on to future generations.

Every Dickinson is engineered and crafted to deliver quality and reliable performance over the long run. Our hard-earned reputation is your assurance of complete confidence and satisfaction.

Dickinson offers one of the most complete lines of premium quality shotguns in the world today. There is truly something for everyone, from small game enthusiasts to upland bird and waterfowl hunters to competitive clay target shooters.

STRENGTH, BEAUTY AND PRECISION

STYLISH SHOTGUNS

Fire has always given strength to steel. In the right hands, it can also impart grace and beauty. Bone tempering the inner parts of a gun's track increases strength while giving the outer part a thin, carbon-rich layer that adds life to the shotgun.

This is a feature often associated with the high-end double-barreled shotguns sought after by top collectors around the world. It is a privilege Dickinson provides on all of its luxury shotguns.

The world's best Turkish walnut wood is combined with metal components hand-crafted by our expert gun makers. In the hands of these artisans, the separate elements of steel and wood are combined to create a whole, functional work of art.

Our gunstocks are created using hand-drawn lines and leveling, and then each is painstakingly finished using a unique patented British paint process. The result is a gun that feels like an extension of your body from the first moment you hold it. Dickinson offers a wide selection of high-quality walnut blanks to choose from, each offering a distinctive combination of rich colors, patterns and textures.

Every Dickinson firearm is made by hand-fitting one part to another. Our craftsmen smoke the steel, then hand-file each part one stroke at a time until it fits with absolute precision. Gradually, the steel parts are brought together into one perfect unit combining barrels, frame, trigger guard and fore-end.

The fine walnut stock and fore-end are carefully shaped and inleted by the hands of our master craftsmen. Finally, the steel is engraved using traditional tools and techniques, creating a unique and exclusive piece of shooting artwork.

GUNS OF

DIS-TION

CUSTOM MADE

gold inlayed

The quality of a gunstock makes all the difference — and says something about the owner, as well. Dickinson Prestige Series stocks and fore-ends are made of the finest quality walnut root taken from centuries-old trees. Each blank is carefully selected and individually classified, then subjected to a long drying process. Only then can our expert craftsmen create custom stocks and fore-ends to match the aesthetic taste, technical specifications and performance requirements of each shooter.

OVER
&
UNDER

The Dickinson Royal Series is a premium side lock shotgun with a CNC-machined receiver milled from a solid block of molybdenum chrome steel. Its premium construction features include a gated barrel selector, heavy-duty hammer springs and precision CNC- machined internal components.

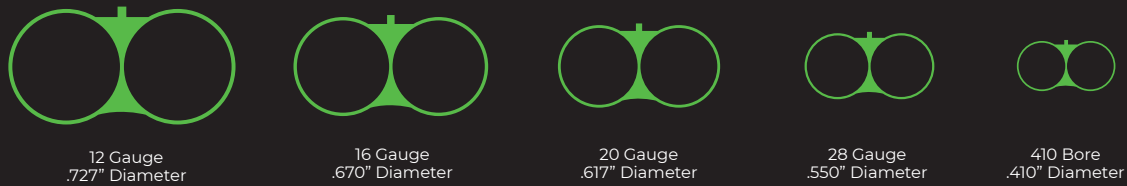

The intercepting safety sear and additional pin anchoring make this gun superior to 5-pin models. The receiver is beautifully hand-engraved in English scroll over one-quarter of its surface. The finish, 24-lines-per-inch checkering and final fitting are all done by hand. This gun comes complete with five thin-walled chokes to cover all shooting situations.

Dickinson engineers its 200 Gold Series Semi Automatic shotguns with the fewest possible moving parts, resulting in enhanced strength and reliability when it matters most. The inertia operated system with a rotating locking head shoots all loads from 28 gr. (1 oz.) field loads up to 50 gr. (1-3/4 oz.) magnum loads (including steel shot) with no adjustment. The recoil spring is housed in the fore-end stock, increasing the strength of the stock while providing a more elegant grip design. This 200 Gold Series' light weight and excellent balance make it ideal for long hunting days walking the field. Composite stocks and camouflage options help match a range of hunting conditions. Fitting the 200 Series with an adjustable comb stock

38 turns this all-around performer into a sporting gun.

A great competition shotgun should feel and perform like an extension of the shooter's body. Dickinson's over & under Osso Series shotguns feature an ergonomic design, unique rib and sighting system to help serious shooters take their performance to new levels. Offered in side lock, side plate and trigger plate actions to match every shooter's desire. Special checkering on the stock and fore-grip provides steady, secure handling while tracking clay after clay. An optional adjustable stock comb is also available.

HUNTING SERIES

The product line from Dickinson ideally combines innovation and tradition. Our shared sense of quality is very strong. The Dickinson line of firearms has undergone extensive testing and is time-tested. This is a characteristic that is frequently connected to expensive double-barreled shotguns that are prized by renowned collectors all over the world. All of Dickinson's high-end shotguns come with this benefit.

For many years, Dickinson tactical shotguns have been the choice of governments, security contractors, law enforcement agencies and others who demand reliable shotguns for a wide range of defense scenarios. Our pump and semi automatic shotgun designs have proven their strength, durability and quality on every continent and in every corner of the globe, under some of the most extreme conditions and situations. These guns are ruggedly built using precisely measured and CNC-cut internal parts, for absolute reliability under fire.

Whether you are a law enforcement officer in a tense and potentially dangerous situation, or a citizen who wants a safe and secure environment for himself and loved ones, you can trust Dickinson tactical shotguns to perform when you need them most.

TRUSTED BY PROFES- SION- ALS

The same high quality standards, advanced materials and painstaking craftsmanship that set Dickinson hunting and sporting guns apart from the competition can also be found in our full line of tactical shotguns.

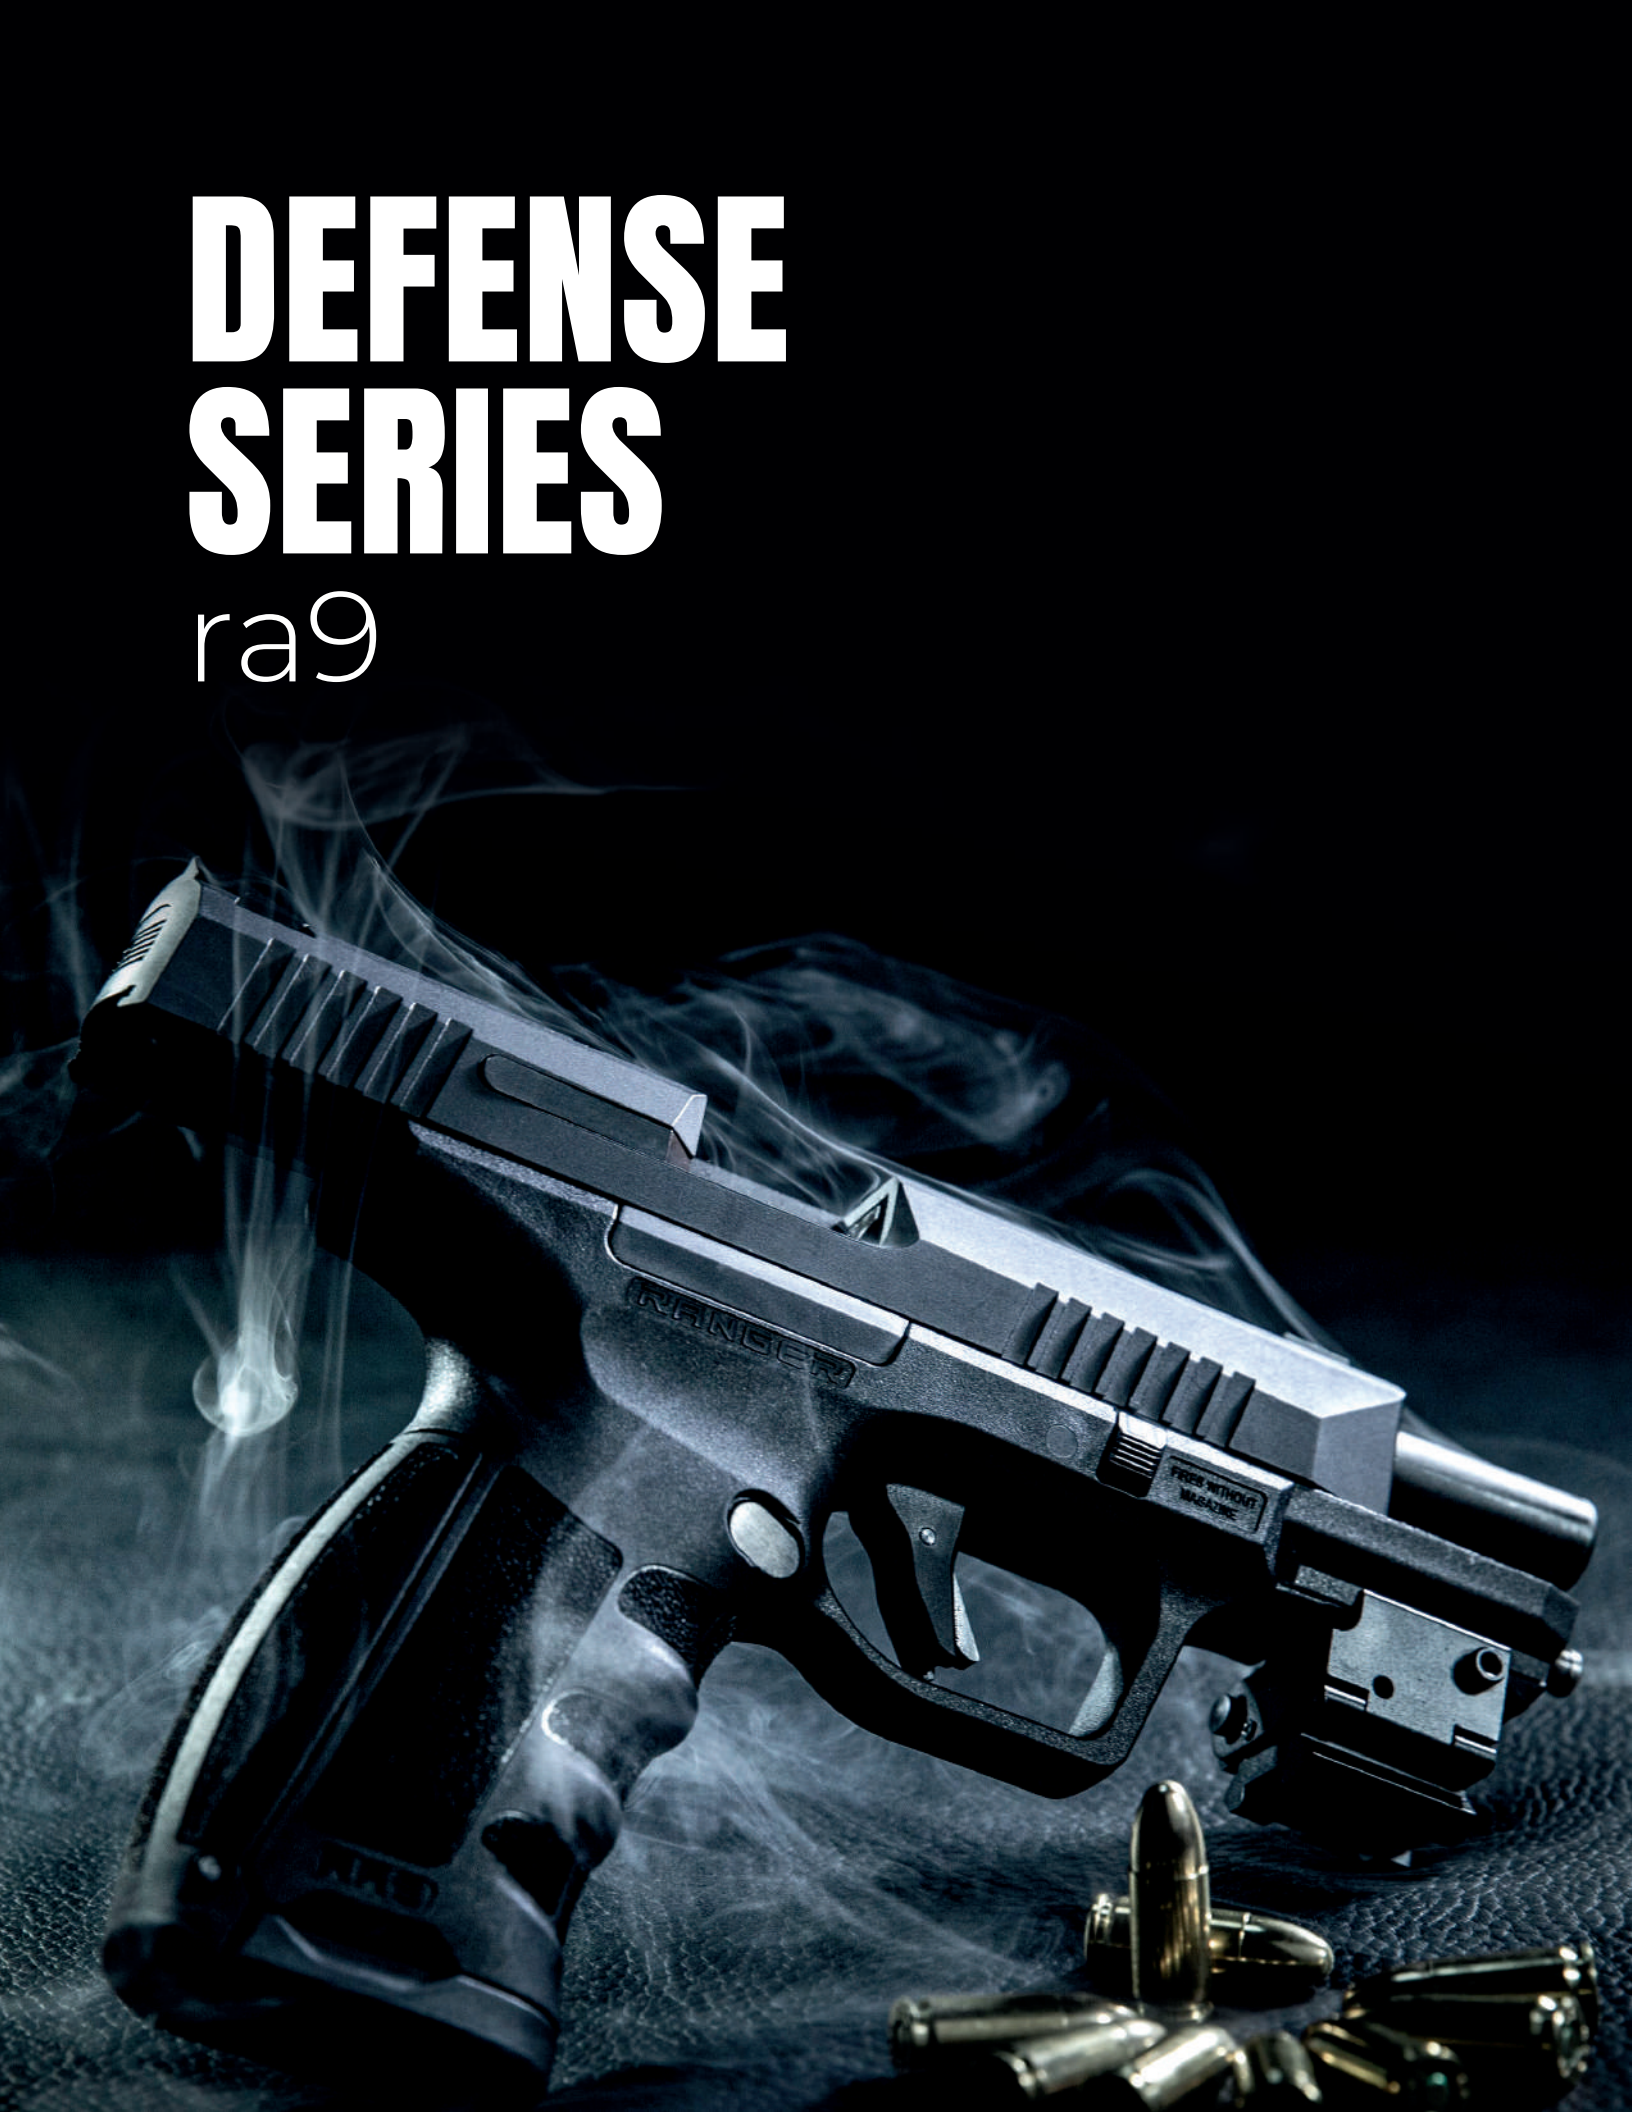

From the moment you first pick up one of these finely crafted firearms, you'll instantly recognize a look and feel that is meant for professionals and serious shooting enthusiasts. Our dedication to both the art and science of gun making is your assurance that when it comes time to serve the public, and protect your own life and as well as others, these guns will perform with reliable precision and accuracy.

Our experts craft each tactical model to the tightest tolerances and test our guns to ensure they meet our highest standards — and yours. We take great pride in how our tactical shotguns look, how they feel and how they perform under the most challenging conditions. The result is a firearm you can always depend on.

The legendary performance of Dickinson tactical shotguns is matched only by their time-proven durability. We stake our reputation on every shotgun we manufacture, and back our products with superior customer service and technical support that is unmatched around the world.

DUAL
MODE

Dickinson ERMox XPA-12 shotgun is a combat dual-mode shotgun, adjustable for semi-automatic or pump-action operation. In semi-automatic mode a gas piston drives a bolt carrier; in pump-action mode the same components are driven by sliding the fore-end backwards. XPA-12 is fed by a detachable box magazine as well.

Dickinson pump shotguns are built using a new design that allows for superior strength, ease of operation and reduced weight. All Dickinson pump shotguns feature double slide bars and a convenient action release forward of the trigger guard that can be operated while wearing gloves. The barrel, fore-end and bolt can be easily removed as a unit to facilitate easy cleaning. These guns operate with superior smoothness whether firing light 2-3/4" shells or heavy 3" shells. Offered with either checkered walnut or polymer stock.
